Data Governance

Release 1.0 - Personal Data and GDPR

Data documentation

Topic	Features	Benefits	Live
Personal data	Possibility to declare a dataset containing personal data	<ul style="list-style-type: none">• 1st step in the GDPR compliance path• Better control on personal data - no blind spots	Sept 2017
	Possibility to declare the field containing the registration date of the personal data		
Consent	In a dataset, possibility to define the field containing user consent and user consent value	<ul style="list-style-type: none">• Improves accuracy on personal data location• Better control on personal data - no blind spots	
Anonymization	Possibility to declare the field to be anonymized	<ul style="list-style-type: none">• 1st step in the anonymization process• Granularity regarding data to be anonymized	
	Based on the registration date, possibility to define a delay after which data is anonymized	<ul style="list-style-type: none">• Automation in the anonymization process• Ease compliance	

The screenshot shows the Saagie interface with a dataset list on the left and a configuration modal for the 'Prospect' dataset on the right. The modal is titled 'Personal data' and contains several sections:

- Personal data declaration:** A checkbox labeled 'This dataset contains personal data' is checked.
- User consent field:** A dropdown menu is set to 'type' and a text input field contains the value 'yes'.
- Entry date field:** A dropdown menu is set to '-- No field --'.
- Anonymization:** A checkbox labeled 'Enable anonymization' is checked, followed by a text input field containing the value '1' and the text 'day after entry date'.
- Fields to anonymize:** A dropdown menu is set to '-- Select a field --'. Below it, four fields are listed with an 'x' icon: 'email', 'first_name', 'home_phone', and 'last_name'.
