

Saagie[®]

Data Governance

Release Note

– v.1.2 –

What's new?

Data Anonymization

- Anonymization process - Open-source anonymization job

Anonymization process

Feature	Description	Context	Benefits	Live
Open-source anonymization job	Open-source job anonymizing selected fields. It substitutes their data with a generated value respecting the same format. Its open-source nature enables its full customization by customers, a proud first for Saagie.	Feature used by CDOs and Data Stewards to anonymize personal data in the context of the GDPR. If needed, customers can modify this template to create their own anonymization job in accordance with their specific requirements.	<ul style="list-style-type: none">- Increased transparency and flexibility in the anonymization process- Increased customer autonomy and adaptability in the anonymization process- Major step in the path to compliance with the GDPR	January 2018
